

## FSC: PROTECT THE FOREST TO HELP CLIMATE CHANGE

### EDANA Sustainability expert webinars

This series of webinars highlights specific topics covered in one of the four pillars of the [EDANA Sustainability Vision](#). They were created to help the nonwovens industry in understanding and processing the abundant information available to strive towards more and viable sustainability solutions.

Previous webinars on Responsible end-of-life: *Chemical recycling in Europe – Pyrolysis - the enabler of chemical recycling of plastic waste*, Eco-efficiency: *Science based targets as foundation of future-proof climate strategies* and *Cradle to Cradle: shifting to a circular economy* attracted hundreds of participants
