

Incontinence Products Testing Working Group Terms of Reference

What is the Incontinence Products Testing Working Group?

The Incontinence Products Testing Working Group consists of member companies of EDANA that have activities in the area of incontinence care.

Objectives

- To establish product performance test methods
- To harmonise the evaluation of absorbent incontinence products preferably using validated laboratory methods having a high correlation to in-use situations. Products in scope include:
 - Heavy incontinence products, used by bedridden adult patients.
 - Light incontinence products, used by active adults.
- To turn these methods where appropriate into internationally recognized standards in order to assure a wide-ranging application.

Who should attend?

EDANA member companies with an interest in incontinence products which have laboratory facilities involved in testing such products.

Participation in a group is subject to the EDANA guidelines.

Benefits

- Influence the development of better, harmonised and validated test methods.
- Networking opportunities with technical experts.
